

BRAND SYSTEM

The Portal Door

Color, Typography & Visual Language

Royal Blues — Foundation

The deep blues hold the night sky of the brand. They appear as the page background, the cosmic gradient, and the surface of every primary button.

Abyss

PRIMARY BACKGROUND

HEX #0B1E52

RGB 11, 30, 82

The base color of the entire site. Used as the body background and the bottom stop of the cosmic gradient.

Night

MID GRADIENT

HEX #132A6A

RGB 19, 42, 106

Middle stop of the cosmic background gradient. Lifts the page out of pure darkness toward the horizon.

Twilight

TOP GRADIENT

HEX #1A3880

RGB 26, 56, 128

Lightest royal in the page gradient. Creates the soft "lit horizon" feeling at the top of the cosmic field.

Button Deep

BUTTON GRADIENT BASE

HEX #0D2362

RGB 13, 35, 98

Top edge of the primary button. Gives CTAs a polished, raised quality.

Button Mid

BUTTON GRADIENT CENTER

HEX #153085

RGB 21, 48, 133

Center highlight of the primary button gradient. Catches the eye on hover.

Sky & Cyan Accents

The sky family carries the "starlight" of the brand. These blues appear in the eyebrow labels, hairlines, glow auras, and as soft body text.

Cyan

EYEBROW / ACCENT

HEX #7DD3FC
RGB 125, 211, 252

All eyebrow labels ("A Story of Awakening", "The Authors") and the italic word "through?" in the CTA. Use sparingly as the brand's signature glow.

Sky

STARS / SOFT HIGHLIGHTS

HEX #BAE6FD
RGB 186, 230, 253

Used at low opacity for the brighter stars in the starfield. Also tints the cosmic glow behind the book mockup.

Frost

SECONDARY TEXT

HEX #E0F2FE
RGB 224, 242, 254

Quiet supporting text — nav links, footer copy, "Available Worldwide" tags. Always at 50–80% opacity.

Azure

COSMIC GLOW

HEX #4A90E2
RGB 74, 144, 226

Mid-tone royal blue used in the bottom-right glow of the cosmic field. Adds depth without competing with cyan.

Mist

PRIMARY BODY TEXT

HEX #E8F3FF

RGB 232, 243, 255

Default body text color. The cool, off-white tone keeps reading comfortable on dark royal blue.

Gold — Sacred Accent

Gold is the most precious color in the system. It marks the title, the CTA buttons, and any moment that should feel like recognition or remembering.

Gold Light

TITLE GRADIENT TOP

HEX #F7E1A3

RGB 247, 225, 163

Top stop of the gold title fill — gives the headline a soft, lit edge as if catching candlelight.

Gold

TITLE GRADIENT MID

HEX #E9C77B

RGB 233, 199, 123

The brand's "true" gold tone. The mid stop of the title and the warm glow under the headline.

Gold Deep

TITLE GRADIENT BASE

HEX #C89A4B

RGB 200, 154, 75

Bottom stop of the gold title gradient. The shadow that gives "The Portal Door" its embossed, bookbinder feel.

Gold Text

BUTTONS (DEFAULT)

HEX #F5D47A

RGB 245, 212, 122

Default text color of the primary and ghost buttons. Border at 45–60% opacity of this color.

Gold Hover

BUTTONS (HOVER)

HEX #FFE4A2

RGB 255, 228, 162

Brighter gold for hover states — both button text and border lift to this color when the cursor enters.

Supporting Tints & Overlays

These are the transparencies and washes that build cards, dividers, glows and depth across the site. They're tints of the core palette, never new colors.

Cyan 55%

HAIRLINE CENTER

`rgba(125, 211, 252, 0.55)`

Brightest point of the horizontal hairline divider that fades to transparent at both ends.

Cyan 30%

CARD BORDER (HOVER)

`rgba(125, 211, 252, 0.30)`

Card border lifts to this on hover. Subtle glow without changing layout.

Cyan 12%

CARD BORDER (DEFAULT)

`rgba(125, 211, 252, 0.12)`

Default border on cards, marquee section, and footer dividers. Keeps shapes felt but not loud.

Card Top

CARD SURFACE

`rgba(19, 59, 116, 0.25)`

Top of the card background gradient. Sits on the cosmic field with subtle blur.

Card Base

CARD SURFACE

`rgba(7, 18, 51, 0.15)`

Bottom of the card gradient. Almost transparent — the cosmic field shows through.

Gold Border

PRIMARY BUTTON EDGE

`rgba(245, 212, 122, 0.60)`

Default border around primary CTA. Lifts to 95% on hover.

Gold Shimmer

BUTTON SWEEP

`rgba(245, 212, 122, 0.20)`

The bright streak that sweeps across buttons on hover. Diagonal, brief, never overdone.

Mist 85%

BODY QUOTES

`rgba(232, 243, 255, 0.85)`

Italic pull-quotes and supporting paragraphs use mist at slightly reduced opacity for hierarchy.

Frost 50%

FOOTER / CAPTION

`rgba(224, 242, 254, 0.50)`

Tertiary text — copyright lines, the "Available on Amazon" link, smallest captions.

Signature Gradients

Three gradients carry the brand. Used together they tell the whole story: the night, the threshold, and the gold.

Cosmic Field

PAGE BACKGROUND

The whole site rests on this. Three soft radial glows over a vertical royal-blue gradient — sky at the top, abyss at the bottom.

```
radial-gradient(ellipse 70% 60% at 50% 20%, rgba(125,211,252,.25), transparent 60%),  
radial-gradient(ellipse 60% 50% at 80% 80%, rgba(74,144,226,.22), transparent 55%),  
radial-gradient(ellipse 50% 40% at 10% 60%, rgba(186,230,253,.14), transparent 55%),  
linear-gradient(180deg, #0B1E52 0%, #132A6A 45%, #1A3880 100%)
```

Title Gold

HEADLINE FILL (180°)

Used as a background-clip on display headlines so the type itself becomes a stamped gold surface.

```
linear-gradient(180deg, #F7E1A3 0%, #E9C77B 45%, #C89A4B 100%)
```

Royal Button

PRIMARY CTA SURFACE

A subtle 3-stop royal gradient that lifts back to abyss at the bottom — gives the button a pressed, jeweled feel.

```
linear-gradient(180deg, #0D2362 0%, #153085 55%, #0B1E52 100%)
```

Hairline Divider

SECTION SEPARATOR

A 1px horizontal line that fades in and out — used between section labels and headlines as a "breath" mark.

```
linear-gradient(90deg, transparent 0%, rgba(125,211,252,.55) 50%, transparent 100%)
```

Button Shimmer

HOVER SWEEP

A diagonal gold streak that slides across buttons on hover. Plays once on each enter; never loops.

```
linear-gradient(120deg, transparent 30%, rgba(245,212,122,.20) 50%, transparent 70%)
```

Typography

Two typefaces, both delivered by Google Fonts. The serif is the storyteller. The sans is the steady hand.

DISPLAY

Step Through

Cormorant Garamond · 400 / 500 / 600 / 700 · Italic available

Used for the gold title, all H2 / H3 headings, pull-quotes, and any italic emphasis. Carries the literary, "old book" feeling.

BODY

A voice for the remembering.

Inter · 300 / 400 / 500 / 600

Body copy, navigation, eyebrow labels, button labels, footer text. Tracking widens (0.18–0.32em) for uppercase labels.

Button System

Two buttons, both gold-on-royal. Use Primary for the main action on a section, Ghost for the secondary read-or-explore action.

Brand Principles

Quick reminders for anyone touching the visual system.

Royal blue is the room.

Never break out of the cosmic field. New sections layer on top of it with cards, never with solid panels.

Gold is sacred.

Reserve gold for titles, CTAs and the moments meant to be remembered. If everything is gold, nothing is.

Cyan whispers.

Cyan is for eyebrows, hairlines and one or two italic words — never headlines, never paragraphs.

Edges stay soft.

Borders sit at 12–30% opacity. Glows are blurred. Nothing on the page should feel hard-edged or stamped down.

Type breathes.

Serif for the story, sans for the signs. Uppercase labels always carry wide tracking (0.18em or more).

Motion is gentle.

Reveals fade up by 12–24px. Buttons lift 2px on hover. Nothing zooms, bounces or spins.
